

MEDLEDGER

Calibration Certificate Test Material

Purpose

Synthetic test material for the MedLedger verification workflow. Register the values below, upload this PDF, and test AI extraction, field comparison, and SHA-256 integrity checking.

Registered Equipment Record

Field	Registered Value
Equipment Name	Digital Patient Monitor
Serial Number	DEF-10293
Manufacturer	MedTech Instruments
Model	PM-5000
Calibration Date	12/06/2026
Expiry Date	12/06/2027
Certificate Number	CAL-10234
Laboratory Name	ABC Calibration Labs
Accreditation Number	LAB-28491
Calibration Result	PASS

Calibration Details

Instrument: Digital Patient Monitor

Measurement Function: Vital-sign monitoring

Calibration Status: PASS

Calibration Method: Standard laboratory reference comparison

How to Test MedLedger

1. Register equipment using the values above.
2. Upload this PDF during registration.
3. Save the generated SHA-256 fingerprint.
4. Verify using the exact same PDF — the hash and fields should match.
5. Make a copy of the PDF and change values such as the serial number, calibration date, laboratory, or accreditation number.
6. Upload the modified copy — MedLedger should report a hash mismatch and identify the changed fields.

Safety Notice

FICTIONAL TEST MATERIAL — NOT A REAL CALIBRATION CERTIFICATE. For hackathon software testing only. Do not use it to certify or operate medical equipment.
